

MTLC CONDOMS

Condoms export offer

Condoms are designed for the most natural sensation & maximum protection.

Condoms can be transparent or opaque, tinted, nipple-ended, rippled, studded, contoured, ribbed, tipped, crowned and some glow in the dark. Spermicidal or not. Condoms are talc free, triple-tested to provide the highest quality and maximum reliability.

You can choose from a palette of sizes, shapes, flavors & colors.

Nonoxynol-9 and Benzocaine can be added to offer **spermicidal** and **delayed** condoms respectively.

We also offer female condoms and condoms without sperm reservoir for female's pelvis ultrasonic examination.

We offer:

High quality products
Reliable services
Prompt delivery
Competitive pricing

MTLC Latex

Major technological properties of condoms

Nominal width	Major technological index
W55mm	Freedom from holes AQL0.25
W52mm	Air bursting AQL 1.0
W49mm	Dimensions AQL 4.0
	Package integrity AQL 4.0

In order to ensure the quality:

1. Every single condom is tested electronically for holes.
2. In addition, samples of every batch of condoms undergo inflation testing. A typical condom will inflate to about three feet high and one foot wide before it bursts.
3. Samples of every batch of condoms also are tested for water leakage. A condom must hold 300 ml [10.2 oz.] of water without leaking.
4. Finally, other samples of condoms are stretched lengthwise and crosswise to test for tensile strength and elongation.

Standard packing sizes

Square foil	60 x 55mm
Rectangular foil	66 x 27mm
